RE: I.D. #CODO75770560

Dear Mr. Duprey:

Thank you for your letter of November 12 concerning our Certificate of Insurance for Closure Care.

Our original intent for registering was to be prepared just in case we decided to start up a treatment process. At this point however we have not made plans for generating, treating, storing or disposing hazardous waste. Under the circumstances we ask that you withdraw Part A of our Hazardous Waste Permit Application.

If at some future date we do decide to initiate such a program, your people have assured us that our request for reinstatement of Part A would receive prompt response.

It is also my understanding that our withdrawal of Part A will eliminate any further action with regard to our Certificate of Insurance for compliance of financial requirements.

Thank you very much for your help.

Sincerely,

R. K. Patrick  
Operations Manager
